## INFLAMMATION AND STROKE

To get **Inflammation and Stroke** PDF, make sure you click the button under and save the ebook or have access to other information that are in conjunction with INFLAMMATION AND STROKE book.

Book Condition: New. Publisher/Verlag: Springer, Basel | Stroke is a leading cause of death in developed countries. However, current therapeutic strategies for stroke have been largely unsuccessful. One possible explanation is that research and pharmacological management have focused on very early events in brain ischemia. New research has shown that brain ischemia and trauma elicit strong inflammatory reactions driven by both external and brain cells. The recognition of inflammation as a fundamental response to brain ischemia provides novel opportunities for new anti-inflammatory therapies. For the first time, an international body of researchers presents the latest findings about the cellular and humoral aspects of immune and inflammatory reactions in the brain. The work may have an impact on the treatment of neuroinjuries and ancillary brain diseases, and increase the understanding of the roles infections and immune reactions play in the brain milieu. | New opportunities for stroke prevention and therapeutics: a hope from anti-inflammatory drugs?.- Inflammation in stroke and CNS trauma - experimental and clinical evidence.- Clinical evidence of inflammation as a risk factor in ischemic stroke.- Inflammation as a risk factor for stroke: evidence from experimental models.- Inflammatory and immune responses to CNS injury: beneficial and detrimental components.- Salutary effect of autoimmune T cells after central nervous system injury.- Traumatic brain injury: is head trauma an inflammatory disease?.- Cyclic activation and inactivation of brain vessels involving inflammatory mediators - implications for stroke.- Inflammatory cells in stroke.- Do leukocytes play a role in focal ischemia in the brain? An objective review of the literature.- The role of microglia in ischemic brain injury.- Inflammatory activation of brain cells by hypoxia: transcription factors and signaling pathways.- Inflammatory cytokines, interleukins and chemokines in stroke and CNS trauma.- Cytokine effects on CNS cells: implications for the pathogenesis and prevention of stroke.- Interleukin-10 in cerebral ischemia...
